DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: The step descriptions disclosed on page 6 line 19 - page 7 line 2 do not coincide with fig. 2. For example, the specification state that in step 201 a first region is selected for analysis but in fig 2 step 101 is where a first region is selected for analysis.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Bell et al. (USPN 5103254).

In reference to claims 1, 3, 4, and 6-28, Bell et al. discloses a method of automatically highlighting focused objects within a preview window comprising the steps of: receiving a digital representation of an image; determining a near focus distance; identifying near portions of objects within the image at the near focus distance; determining a far focus distance; identifying far portions of objects within the image at the far focus distance, and highlight the near portions and the far portions of the objects within the image, col. 7 line 51 - col. 8 line 2. Bell et al. also discloses an image sensor, ref. 40, responsive to a light image projected onto the image sensor for providing image
